

I arrived in North Lake Tahoe 27 years ago and straight away fell in love with the Lake and the amazing Community. I started Tahoe Moon Properties 21 years ago thinking I would have a small business that would allow me to spend time with my children. A lot has changed since then, but some things have remained the same, we still have an incredible community and a stunning place to live. I feel that we are at a tipping point, and we really need to come together and honor our positions as stewards of the Lake in order to make sure we can maintain the local community, control the growth and traffic into our area and keep a sustainable business community. So, I have decided to run for a position on the North Lake Tahoe Resort Association Board in the hope of being part of the solution we need.
